

## Motor-boat (houseboat) Vistula Cruiser 30 - New!! Debut of the structure in 2010!

### A perfect way to spend a family vacation, full of adventures

In our newly established boat yard we manufacture motor-boats Vistula Cruiser 30 of our own design and engineering. The boats' furnishing is tailor cut at our customer's request. Our extensive experience, gained step-by-step during the cruises along the Vistula so hard for navigation as well as other rivers and canals in Poland enabled us to meet the expectations aquatics lovers and build perfect boats to cruise along European inland and coastline waterways.

In order to move freely along the Vistula, our yachts are of relatively low draught and weight parameters (at the same time being the largest vessels capable of efficient navigation all along the river), with appropriately selected motors and ratio (so-called towing), at the same time, however they provide full comfort during the long travel - the standard facilities in addition to the WC and shower with hot water also include central heating, fully furnished kitchen (dishes, pots, pans) with refrigerator, hot and cold water, TV set and DVD player. Each yacht has comfortable places to sleep (IN THREE INDEPENDENT, SEPARATED ROOMS) for seven adult people and cabinets to put clothes and personal things in. The large cockpit finished with the escutcheon is characteristic, providing security for family tourism, with little children in particular.

The cockpit shaded by a roof protecting it against rain or sunshine. The roof also functions as the carrier for the seven bicycles provided aboard - for all the passengers. In case of bad weather part or the whole cockpit may be protected by tarpaulin elements attached to the roof and deck.

Thanks to the large fuel and water tanks provided, the vessels are practically self-sufficient - therefore, instead of staying overnight in confined boat-houses, we may delight in wildlife during night mooring at a sandy Vistula river bank or an island.

Moreover, each vessel is equipped with all that is necessary in water, including without limitation the complete set of ropes, anchors, scoops, buckets and blankets for all the passengers plus a binocular.

Technical Details	
Overall length	9 m
Overall length (with the platform)	9,50 m
Beam over all	2,92 m
Height over the water line	2,95 m
Height over the water line without a roof	1,95 m
Height in cabin	2,00 m
Weight of boat	3 000 kg
Fuel tank	120 l
Water tank	800 l
Passenger limit - max	12
Draught	0,45 m
Berths	7 (IN THREE INDEPENDENT, SEPARATED CABINS)
Design category	C

- 2 boats (2010/2011): NOWA ALEKSANDRA and MAGDALENA with outboard gasoline engine Yamaha 25 KM High Trust - AFTER GENERAL REFURBISHMENT at the beginning of the 2012 season, including without limitation polishing the deck, new upholstery, toilet and shower.
- 1 boat (2012): DOMINIKA with inboard diesel engine Craftsman 27 HP and bow-thruster

**WEEKEND 820 deLUX motor yacht - AFTER GENERAL REFURBISHMENT at the beginning of the 2011 season, including without limitation polishing the deck, new upholstery, marine toilet.**

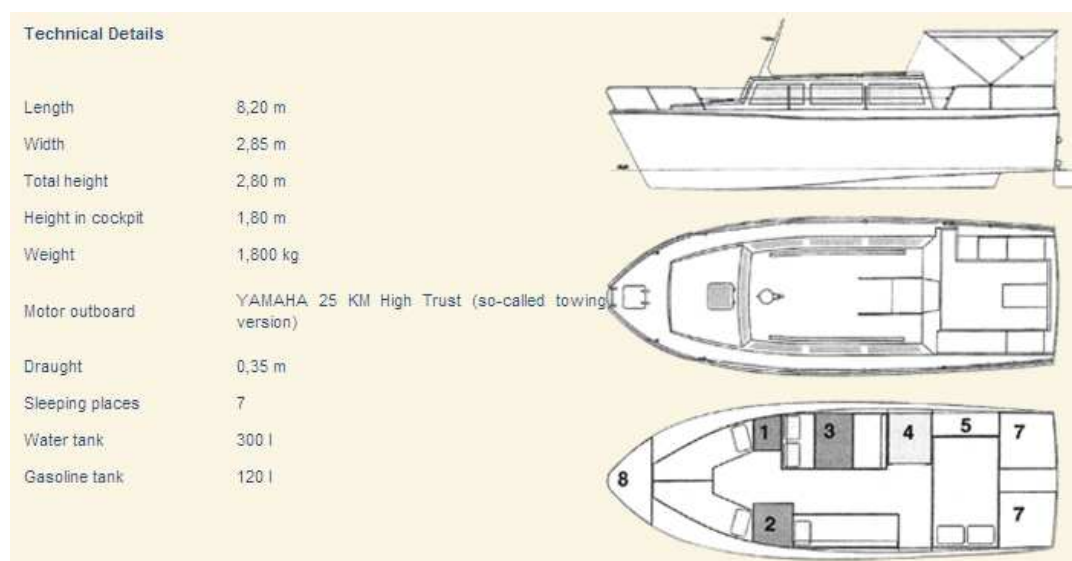

The fleet of „The Vistula Cruises” has been selected appropriately – it is a compromise between the navigation possibilities and traveling comfort. All the vessels are brand new) – built in the shipyards in turn of 2007/2008. In order to move freely along the Vistula, our yachts are of relatively low draught and weight parameters (at the same time being the largest vessels capable of efficient navigation all along the river), with appropriately selected motors and ratio (so-called towing), at the same time, however they provide full comfort during the long travel – the standard facilities in addition to the WC and outside shower with hot water also include central heating from TRUMA, fully furnished kitchen (dishes, pots, pans) with refrigerator, hot and cold water. Each yacht has comfortable places to sleep for seven adult people and cabinets to put clothes and personal things in. The large cockpit finished with the escutcheon is characteristic, providing security for family tourism, with little children in particular.

The cockpit shaded by a roof protecting it against rain or sunshine, with additional foil and tarpaulin element, mounted and dismantled easily. The roof also functions as the carrier for the seven bicycles provided aboard – for all the passengers.

Thanks to the large fuel and water tanks provided, the vessels are practically self-sufficient – therefore, instead of staying overnight in confined boat-houses, we may delight in wildlife during night mooring at a sandy Vistula river bank or an island.

Moreover, each vessel is equipped with all that is necessary in water, including without limitation the complete set of ropes, anchors, scoops, buckets and blankets for all the passengers plus a binocular.
